

Application Note : 3

X-ray
line scan camera

Security

Cargo inspection (High power X-ray application)

The line scan camera is capable of imaging large objects such as truck cargo inspection since custom-made cameras with a wider field of view are available on request.

3000 mm effective area with 1.6 mm sensor

Baggage inspection

The camera can detect different metal materials within bags and it allows even more accurate identification during baggage/luggage inspection.

Laptop PC

Gun *The photo is a model gun.

System configuration

Note

- The X-ray line scan camera consists of only a sensor head. The image display equipment and the X-ray source should be ordered separately.
- The power supply unit, digital interface cable, computer, X-ray source are necessary. Please consult your local sales representative about connector formats.

- Product and software package names noted in this documentation are trademarks or registered trademarks of their respective manufacturers.
 - Subject to local technical requirements and regulations, availability of products included in this promotional material may vary. Please consult your local sales representative.
 - Information furnished by HAMAMATSU is believed to be reliable. However, no responsibility is assumed for possible inaccuracies or omissions. Specifications and external appearance are subject to change without notice.
 - Please note the X-Ray images on this brochure are taken for test purpose, the images do not reflect actual qualities of the products on the market.
