

The C13182-01 is a counting unit designed for high-speed light detection. A high-speed photon counter can be configured by combining this unit with a high-speed amplifier. This unit uses the double-counter method that has two counter circuits to allow measurements with no dead time.

FEATURES

- Ideal for photon counting using a high-speed photodetector such as a Hybrid Photo-Detector (HPD)
- Count linearity: more than $5 \times 10^7 \text{ s}^{-1}$
- USB interface allows high-speed data transfer
- Accurate measurement with no dead time (Double counter method)
- Sample software bundled

C13182-01-A1: for Japan
C13182-01-A2: for USA
C13182-01-A3: for EU
