For the fiscal year ending September 2021, the forecast for business results for Net sales, Operating profit, Ordinary profit and Profit attributable to owners of parent exceeded the previously announced forecast, due to a steady expansion in sales, primarily for medical and industrial instruments, and to the impact of yen depreciation than expected, despite the effects of COVID-19.

### (2) Reason for the revision

Hamamatsu Photonics K.K. considers the distribution of operating results to shareholders through the payment of dividends to be the first priority. Our basic dividend strategy outlines steadily increasing dividends through continuous growth in earnings per share by enhancing and strengthening its corporate earning capacity based on a long-term perspective. Furthermore, our policy is to achieve the stable increase of dividend payout ratio of around 30% of profit attributable to owners of parent.

Based on the basic policy described above and our earnings forecast for the fiscal year ending September 30, 2021, we have revised our forecast of the year-end dividend for the fiscal year ending September 30, 2021 and will increase the year-end dividend by 8 yen to 28 yen per share.
